■Aug-15 all machineries expected to complete and ASJ will have 10B capacity by Aug-15.

■Sangkang (CCTC) shipment coming in 20FCL about 1,000K maximum once a month shipment.

■Substrate stock level maximum 30 days. Plan to reduce to 15 days which will give Maruwa advantage.

■Ms. Sun informed that Sangkang (CCTC) ship 31,000K/month excluding chip array.

2. Power chip usage YA2512, YA2010, YA1210 very few quantity. ASJ want Maruwa to concentrate above 4 type.

3. 7910M rank69 Lot No. HF44 41.4Kpcs dimension out. ASJ not take average = W1+W2. Lot data was OK as below data. But yet ASJ (Mr. Shafiq prod) request Maruwa help to tighten internal spec to avoid printing shifted.

4. ASJ (Mr. Shafiq prod) request 0402 7910M 1206 type master ranking for below rank (10-15pcs/rank of rank 21 31 41 51 61 71 and 81). They commented that master rank given to them before was very good for printing alignment purpose. I told that takes few months to provide them.
5. Incoming QA have not found quality issue as today.
6. I also mentioned that Maruwa will change new up-grade/stronger carton box by end Jul or early Aug. Mr. Penny request shipment information so he can help to check and give feedback.
7. Ms. Sun advice to take care Ralec China/Taiwan order. She was told regarding wooden stopper problems cause 7910M delay. I had told that 19-Jun shipment onwards we had change 100% without wood (steel stopper). And complaint from Ralec might cause ASJ order to Maruwa.
