Mr Robin accepted and the same product measurement under smart scope shows + 5micron Will further discuss with prod Eng on this																																																				
Meeting with Purchaser Ms Vivian Feedback very similar with the other customer on the customer response and service. Promise that frequent visit and updating of improvement activity will be done on monthly basis. Customer mainly making a comparison with ECT method on solving quality issue																																																									
Conclusion & Opinion																																																									
Customer basically requesting Maruwa to improve especially on the Crack and avoid all the unwanted failure such mix product, shortage quantity etc. They are welcoming the Maruwa's move of coming and looking at the problem which they believe that the info can be delivered directly to the production without going thru the 3rd party.
