Recurrence: (none)

Organizer: Rosli Ahmad

Categories: Business Trip

ASJ: Ms. Sun, Mr. Izam, Mr. Thian, Mr. Penny, Mr. Jovi
Maruwa: Rosli, Mr. Siva, Mr. Ogawa

Agenda

■0402 7910M angle ±

Cause printing shifted. 32 lots (200 plate/lot) was scrap in Oct which not possible to sorting. ASJ officially request to separate angle ± as

Others supplier Sangkang (CCTC) had done since they supply ASJ from Jun-15.

We agreed but request time since Maruwa just started to study and doing ranking testing. I had requested few if Maruwa separate angle ±

Where ranking process will take longer time and slow down ranking accumulation.

1. Min quantity/rank 30K must reduce, today we suggest 5K/rank
2. 1K/rank per carton to be allow for shipment (current 1.6K/carton)

Mr. Siva given 2 bundles sample +(p) and -(m) rank for test printing. 2nd meeting after Deepavali to discuss:

- a. min qty/rank to be re-set after ranking test run
- b. new lot shipment date

With angle +(p) and -(m) ASJ production feedback that they will be able to use others rank (NCR) or open more ranks in future.

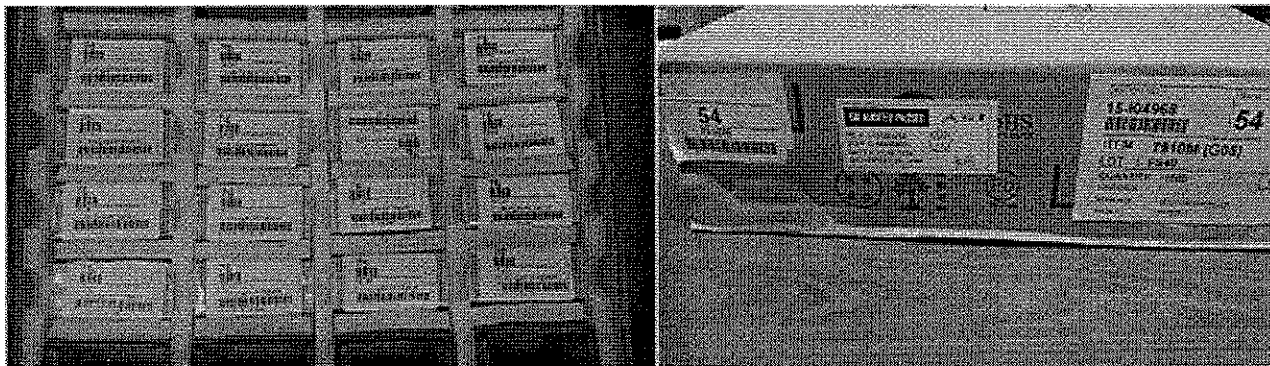

■0402 chip edge break

After chip breaking process, Mr. Jovi found only Maruwa having problem edge break. No similar problem from Sangkang product. This is serious

Issue which might related to market claim from ASJ end customer. Today shown from Lot PO-09.

■0402 7910M wrong label

Ms. Sun and Mr. Penny agreed Maruwa to replace with correct label.

Actual Product: 7910M rank76 1,600pcs

Outer Carton Label: 7910M rank54 1,600pcs

■Oct production plan 10B, next target within 4 months to increase to 12B.
