Agenda

Meeting started of with QUALITY

1. Discuss on the YC102 inner dimension and differences due to tolerance change from 20u to 30u. YAGEO agreed to change back according to drawing

* Even spec change to $\pm 30u$, there are measurement showing lower and this is due to outer dimension at the minimum spec.

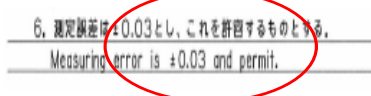

Propose : introduce bias 10u since the value differences is about 10u PIC: Mr Izumo/Siva

Other discussion as shown in table below

General

Explained on MARUWA's activity on product handling and process control. Played the handling video and explained the action taken.

Meeting adiourned at 5:00pm

Conclusion & Opinion

YAGEO commented that problems decreasing but only issue is the crack. MARUWA's action item are clear but only the effectiveness towards YAGEO incoming.

MARUWA- Will focus on the colouring process by reviewing the current colour material. This will be a short team activity to eliminate return from YAGEO group
