

Customer: PANASONIC JAPAN		Date: 20-Sep-17	Time: 8:30
Participant From Maruwa		Participant From Organizer	Report To
1. Mr Siva	MMSB QA	1. Mr Yoshida	QA
2. Mr Matsumoto	JP MW SALES	2. Mr Sakai	QA
3. Mr Itaya	JP MARUWA	3. Ms Hamada	IQC
4.		4 Mr Okui	SQM
5.		5. Mr Ishikawa	Purchasing MGR

Agenda

Meeting started at 8:30AM

Main agenda for today is to finalised & follow up the previous request for ALT8GKB Thickness action.

MARUWA		
ALT 8 GKB estimated contamination quantity Summary ALT8GKB 推定混入数 まとめ		
	June Chip sorting 6月チップ選別	August Chip sorting 8月チップ選別
Gauge sorting NG chips ゲージ選別NGチップ数	26900pcs	257pcs
NG chips thickness NG(%) NGチップ板厚NG(%)	27% (100pcsの測定結果より)	71.2%
Estimate NG chip Q'ty 推定NGチップ数	7200pcs	183pcs
Reproduction test Non-standard thickness area 再現試験より板厚規格外の エリア	Area of 6 - 7 mm 6-7mm の範囲	
Pitch width of substrate 基板のピッチ幅 1.5mm	It affects about 5 rows / sheet 約5列に影響する/sheet	
1sheet シート当たり	1列19pcs × 5列 = 95pcs/sheet	
NG substrate quantity calculation NG基板数 算出	7200pcs / 95pcs = 76 sheet	183pcs / 95pcs = 2 sheet
Conversion of press production プレス生産数換算	100sheet	3sheet

Explained that the 2nd thickness claim was due to mix of balance product at packing Inspection.

Action

Maruwa stop using the balance product and will use the new bundle at the beginning of process by taking the 1st bundle before inspection

Other Request

Automation

Casting machine auto thickness measurement - requested to be fully functional during

Informed that MARUWA will expedite to complete it by 27th Sept

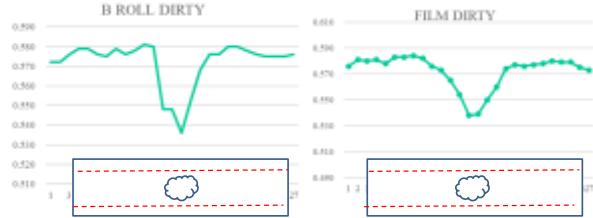

Panasonic - Mr Yoshida & Mr Sakai requested MARUWA to review back the entire process and look into all the loop holes to avoid any repeating issues. Reminded again that the parts are supplied to AUTOMOTIVE industry.

Other finding and tasks have been attached. Panasonic will verify all the action items during 27th ~ 29th Audit in order to close the 8D

Meeting adjourned at 1:00pm

Conclusion & Opinion

As mention above, Panasonic requested Maruwa to re-check the process and identify all the potential risk for occurrence of technical/design claims. Panasonic will carry out detail investigation and will request many action item if related to technical / design claims.

No	Complaint		Details	PIC	DATE
1	ALT8GKB THICKNESS NG	FTA update	FTA need to include at the verification result impact for HIGH or LOW thickness	Mr Thivakar	
2			Review FTA by adding item as mention below a. Power failure b. Casting machine line speed c. Casting machine rollers d. Other wear & tear Casting parts	Mr Siva	
3			Thickness trend immediately after break lock (To understand the thickness retrun to normal condition)	Mr Thivakar	
4			Casting line speed movement, consistent or fluctuate	Mr Thivakar	
5		Casting Machine control	Film dirty & B Roll dirty - other area trend 	Mr Hamizee	
6			The above trend shows at the dirty area, need to measure the dotted area		
7			Differnces of Casting machine operation before & after installation of INVERTER	Mr Thivakar	
8			FILM joint record (Inclusive of film joint verification)	Mr Sharil	
9			Technical data for film surface using SEM for 1x, 10x 20x film	Mr Hamizee	
10			Pull test for film and green sheet	Mr Hamizee	
11			Request MARUWA to change the term MOP to other name	Mr Thivakar	
12		Packing Inspection	Record for balance product and NG rank distribution for the effected Lot Nos	Mr Puvan	
13			Packing inspection - review back the Packing Inspection process inclusive of a. Traceability, b. 5S/Indicationc. System and establish rules	Mr Puvan Mr Dheena	
14		Warehouse	Shipping lot No KK(MIX LOT) control point. Now no shipment indicated	Ms Sulaiha	
15		Maruwa request	SHIPMENT MARKING - S MARKING request to stop PANASONIC agree to stop marking S on bundle & carton with current control method (Gating : 0.53 GAUGE) GLASS GAUGE retrun to 0.62 (normal condition) after CASTING implemented THICKNESS SENSOR	Mr Siva	
16			REQUESTED a. Casting FILM to be used only for 1x for PANASONIC products b. Focus on the 5S, 3F c. Balance control/stock control D. B.Roll cleaning timing C. Report submitted to Panasonic need to have approval		
1	ALT16-4TB THRU HOLE SHIFTED	8D Report	Chip scrap cost will be informed to Maruwa by Panasonic purchasing		
2			Revision date & no need to track and update	Mr Siva	
1	ALT10-2TE DIMENSION NG		All evidence need to attach separately with the 8D. No need to include as image in the report body. Additional comment stated in the revise OPL need to include in 8D report as well	Mr Siva
