Tolerance is ±0.02mm

△6. 測定誤差は±0.02とし、これを許容するものとする。

Measuring error is ±0.02 and permit.

Viking requested not to include the measurement error during Ranking process

MARUWA

Ranking process only uses the spec stated in drawing. The measurement error is only applicable as standard between MARUWA & customer

Viking requesting to return the product and re-rank it.

MARUWA have no reason to approve the return. Requested to VIKING to special release and use it since product is within the specification

Additional action

Provide 20pcs of 3080M for VIKING Hsinchu to confirm the measurment value. This is to confirm that there will be a differences when measured different location. The measurement difference is less then 10u for LD & WD

Topic #2 - 1598M-R DIRTY

Customer found dirty mark on the product. This was detected during IQC and total qty effected is 112kpcs

Requested customer to use but rejected and request to return the qty.

- Other item
- a. Inspection report can be sent by softcopy. Effective from next shipment
 - b. Presented MARUWA`s improvement activity for Q3
- No any quality & delivery issues for Substrate
- Meeting adjourned at 12:00pm

Conclusion & Opinion

VIKING still not able to understand th emeasurement error which applies for differences of equipment. Keep on requesting MARUWA to include the measurement error in the Ranking spec which will not practical.
