

Customer: VIKING KAOHSIUNG		Date: 12-Sep-18	Time: 11:00
Participant From Maruwa 1. Mr Eric Maruwa Taiwan 2. Mr Siva MMSB QA 3. Mr Amirul MMSB QA 4. 5.		Participant From Organizer 1. Mr Tony Production 2. Mr Jam Engineering 3. Ms Sophia Logistic 4. 5.	
		Report To 1. Mr.Anthony,Mr.Ogawa 2. Mr.Seeni,Mr.Naga,Mr.Sinna 3. Mr.Theva,Mr.Shahrudin,Mr.Fauzi 4. 5.	

Agenda

Meeting starts at 11:00am

Below is the topics discussed

VIKING KAOHSIUNG IMPROVEMENT ACTIVITY FOLLOW-UP		12-09-18			
No	VIKING KAOHSIUNG REQUEST	MARUWA REQUEST	DETAIL/REPLY	PIC	DATE
1	T504-4R7		Printing error due to inner dimension.	Mr Siva / Mr Amirul	12th Sept
2	Overall product		Outer dimension measurement value didn't meet the actual rank measurement	Mr Siva	Ongoing
3	AUDIT		Need to update evidence from previous viking audit on Quality Plan	Mr Salleh/ Mr Amirul	21st Sept

Explanation for the Viking request

1. T504-4R7 Printing shifted

MM stopped the BIAS implementation due to complaint for WD outline NG. By doing that, the problem of printing error. Viking found printing shifted for LD direction and MM implemented back for LD

T504-4R7 - Problem solved and new product shipment from Sept18

2. Outer dimension mismatch with Rank

No detail measurement provided, MM propose to look into a few area in Viking before MM to carry out any action

a. Product placement method - Index position

b. Include measurement error of 0.02

c. LD & WD need to be measured as per drawing (7mm from the edge) and need to take the average value

Viking will confirm all this and MM also requested to send some measured sample for confirmation

Conclusion & Opinion

Viking is very happy with the consistency of Maruwa's quality level. Pinhole have stated 0 case for 2018 as well as for the crack. Viking will take the same necessary action internally and hoping Maruwa can support Viking in term of shipping out more qty. Currently Maruwa is in A rank supplier in term of quality & cost.
