Meeting starts at 02:30pm

Discussion with the R&D team & QC team

Topic 1 - Bending strenght failure at Jiangsu

Upon confirming the sample from MM to jiangsu. Requested Jiangsu to measure as shown in data below. The same data was key in in our system for bending strenght measurement
 ==> Result shows all measurement are within the spec.

Explained to Ferrotec team on this status and have accepted there is an error at Jiangsu.

Both MM & Ferrotec team review the calculation method and found that MM is using the excel & Ferrotec is using the minitab.
 Both team will check on their individual system to conclude later.

Jiangsu also have shown a sginifocant low value of bending strenght at 250 & 302. This will confirm by Ferrotec shanghai

Measurement comparison between MM & Jiangsu

Topic 2

Surface uneven due to Edge warp.Ferrotech request stop the flow out form maruwa and find the cause this found at product 138x190x0.38HBS2

Topic 3

Ferrotech found product 130x190x0.38FR have bubble after copper bonding
 Request maruwa team find the cause of this abnormality.

Below is the detail of the action plan

MARUWA

SHANGHAI SHENHE - FERROTEC EXTERNAL VISIT - ACTION PLAN

22/10/2019

No	Product	Activity	MM		FERROTEC	
			Date	PIC	Date	PIC
1	138 x 190x 0.38FR 138 x 190 x 0.38 HBS2	MM & Ferrotec will confirm both side measurement accuracy for bending strenght MM : Excel base calculation Ferrotec : Minitab	TBC	Mr Zamri		
2	138 x 190x 0.38 HBS2	Detected edge warp and no spec define in QDS. Will develop sample with measurement for spec confirmation. A. 5um b. 10um c. 20um	31st Oct	Mr Sashwin		
3	138 x 190 x 0.38FR	Detected bubble on the copper surface due to bumpy on ceramic surface. Requested MM to check the process of occurrence & flow out prevention. Cases are increasing lately	01st Nov	Mr Zamri		

Meeting adjourned at 5:00pm

意見・Opinion

Ferrotec found that MM product recently showing an increasing trend on the visual defects. Requested to check on the manpower status whther any new operator have been input for visual. Requesting also to focus on the occurrence instead of flowout. This is to avoid the repetition of the problem.
