Summary of discussion

## 1. ON-hold & rework status

Summary

| NO | PRODUCT | QTY     | RM     | Remark        |
|----|---------|---------|--------|---------------|
| 1  | 1598M   | 600kpcs | RM49k  | Dent          |
| 2  | 3080M   | 110kpcs | RM0.9k | Crack         |
| 3  | RA12-4  | 300kpcs | RM54k  | Slit printing |

Dent Sorting

Training done for Royal IQC members

Dent spec : Limit to 35u

Set of Limit sample prepared and provided for reference

Total of 5000pcs sort by Royal team and re-confirm by Ms Pavitra

NG % detected : 5% ~ 7%

Will continue to follow up the sorting progress by Mr Ronny

## 2. RA12-4 – No printing on slit

Qty on hold ; 300kpcs

### 1st Action

MM ==> Categorised qty according mould shot qty (100k, 200k & 300k)

Royal test result ==> still detected non printing chip

Next action ==> 2x printing for all on-hold

2x printing cost ==> RMB0.3/pc => Requested to review the pricing (300kpcs x RMB0.3 x 0.6 = RM54k)

New sample 600pcs ==> Change of angle from 25 to 20 (LD) & mould short confirmation before proceeding mass production

## 3. Thin Substrate 65x74x0.2t

Current approved sample : HBS2 Type #3 (Low temp, low particile size)

Royal requesting for 10kpcs but need to set the target price at 14 Yen

Action: Maruwa will review the pricing towards the target price

## 4. Thin Film Product (HAKUMAKU)

Royal is using 50kpcs/type. Genarally using for M type product (3080M, 1598M, 874, YA2512, YA2010 & YA1210)

Royal will provide the specification for Maruwa to submit samples. Current product purchase from Sankang.

Sankang is preparing the thin film by sandblast(Honing).

Meeting adjourned at 12:45pm

## 意見・Opinion

Maruwa need to improve in the quality especially quality issues. Response slow and disposition on the on hold taking a long time. For thin product, overall Royal usage expected to increase from 600kpcs to 700kpcs in 2020. Mr Louise is expecting some improvement in the pricing and certain allocation of share can be given to Maruwa.
