

Customer Visit Report

MM-IN-RD-9100-P06-04
Rev: 1

Customer: Haemonetics Penang				Date: 21-Feb-24	Time: 9:15
Participant From Maruwa		Participant From Organizer		Report To	
1. Mr Siva	Maruwa Malaysa	1. Mr Allan	Plant Director	1. Datuk Anthony & Mr Sasaki	
2. Ms Adibah	QA	2. Mr Saw	Engineering Mgr	2. Mr Justin & Mr Prasan	
3.		3. Mr Chun Seng	Engineering	3. Mr Naga	
4		4 Ms Wen Chee	Purchaser	4 Mr Sathia & Ms Pang	
5.		5. Ms Sim	Material Planner	5. Mr Mori & Mr Lai	

Agenda

Meeting started of with quality discussion

Time : 9.15am ~ 12.30 pm

Failure of visual : Crack

1. Currently HAE is doing 100% incoming crack check before releasing the lot to production and HAE have MM requested to carry out some evaluation and testing on fracture toughness & bending strength. Required to do the comparison towards pink ceramics in order to identify the difference

2. HAE requested to do some evaluation on the "effective thickness" and send them 500pcs sample of the minimum & maximum thickness.

3. Explain regarding the findings of grinding process : sludge sediment in the tank during the process and details as per attached.

4. SCAR Report completed together with SQE & reviewed together with HAE. Maruwa to input the target dates for CAPA completion.

Details of action item explained in the below table

Commercial Discussion : 2.00pm ~ 4.30pm

1. Tooling & Machine Qualification

Qualification of all Press machine (Balance : 4 machine), Grinding machine (Balance : 5 machine)

Pressing Tool J - In process

Upcoming Tool Qualifocation (K,Q, R & S)

Qualification will be carry out for the balance machine of press & grinding (March & April)

2. Delivery Plan March 2024 onwards

March - 200k pcs/week

April - 204k pcs / week

May-206k pcs/ week

June - 208k pcs / week

July - 300k pcs / week

Aug - 320k pcs / week

Sept - 360k pcs / week

3. Logistics - US

M proposed to follow similar packaging method as per current pink box shipment to MLX to Clinton

Details of action item as per attached report. Meeting adjourned at 4.30pm.

Conclusion & Opinion

Mr Allan accepted the Rootcause & CAPA by Maruwa for crack issue. The current challenge is to convince the Clinton to resume maruwa parts. The expansion line is ongoing & process validation will start in April. The new line will purely depends on Maruwa ceramics & requested Maruwa to confirm the exact date of machine incoming.

HAE & MM - QUALITY & COMMERCIAL ACTION PLAN

No	Section	Process	Activity	Date	Pic
1		Fracture Toughnes	Fracture toughness measurement is expected from Japan for week of 26-Feb	26-Feb	Adibah
2	Quality	Bending Strength	Provide Bending strength data for min thickness & max thickness for both Maruwa Ceramic & HAE Pink Ceramic	28-Feb	Adibah
		Crack Assesment	a. 500x HS Bowl assembly, each with 4 groups of DOE samples: 1. Group 1: Minimum Thickness with maintain step height b. Group 2 : Maximum Thickness with maintain step height. C. Group 3: 500 samples from 32k lots to Clinton (after improving grinding control + 200% inspection) d. Group 4: Control samples	On-going	Adibah Amir
		Capacity Ramp Qualification	1. Pressing Tool J - In going 2. Upcoming New Pressing Tool (K,Q, R & S) 3. SCN request for additional pressing units (4 machines) 4. SCN request for additional grinding machine (5 machines) 5. New pressing machine & grinding machine	Aug-24	Siva
4	Commercial	Demand	April - 204k pcs / week May-206k pcs/ week June - 208k pcs / week July - 300k pcs / week Aug - 320k pcs / week Sept - 360k pcs / week		Justin Prasan
5	Packaging		Maruwa requested on US shipment to use same packaging method as MLX Shipment using pink box with 32,000pcs per pallet.	m HAE side	Sazlina
