Magnetize Machine BB087

(Nasheng)

Date : 22/08/2024

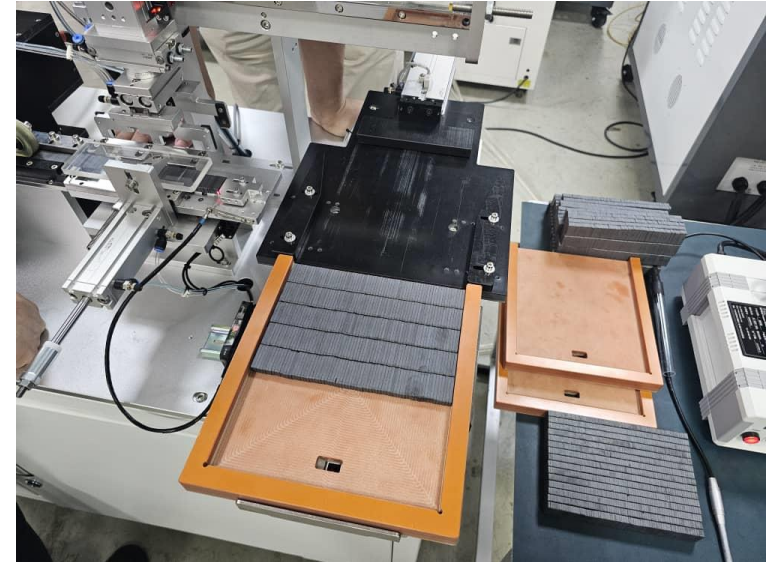

Meeting member : Mr Afiq (Maruwa)
Mr Kitauji (Maruwa)
Mr Miyano (Maruwa Japan)

CONFIDENTIAL

Discussion details

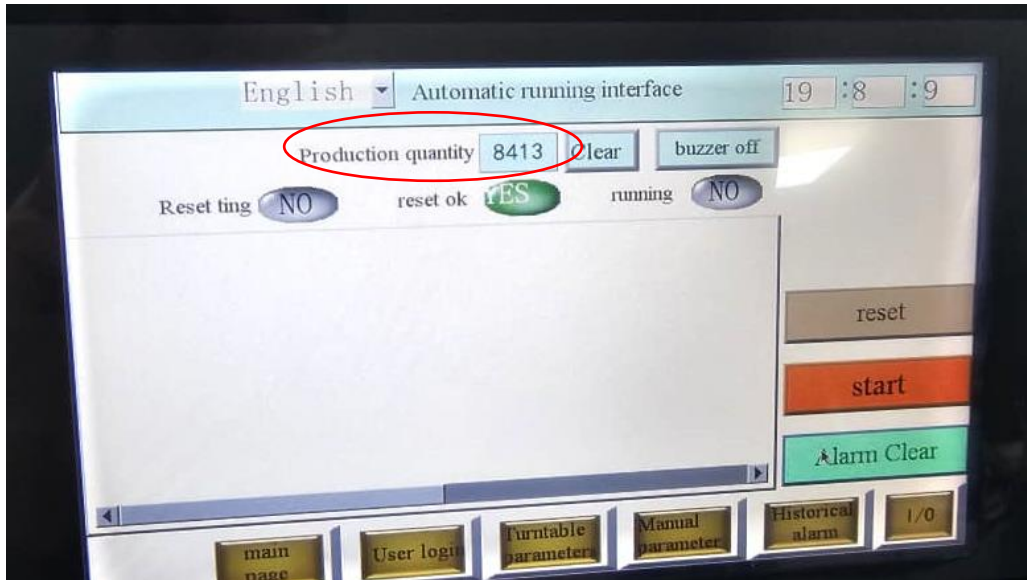

Date: 22/08/2024

Time : 1.00 pm

Magnetize Machine Testing/Buyoff:

- Magnetize machine continuously running to magnetize BB087 (8413pcs) throughout the machine testing. One line 65pcs follow packaging quantity.
- Supplier will improvise the tray mechanism by extending it to meet out current painting tray size (increase capacity before painting).
- For operator safety, supplier will include cover protection for pusher mechanism during pick/place.
- Supplier will provide additional spare parts and spare parts list for production.

Total Product Counter Include

Supplier will provide cover for pusher

Increasing output tray length same as paint tray

Discussion of other magnetize project:

- Informing Nasheng supplier regarding magnetize machine for WBB 1469, MO 464 and MO 435 products.
- Discussion with supplier regarding Visual Machine for BO 068, BO 056 outer and inner dimension checking.
- Discussion with supplier regarding auto painting machine for WBB 1469 and MO products using stamp/laser jet paint method.

Conclusion:

- ➔ Nasheng supplier request Maruwa to sent more BB087 sample
- ➔ Magnetize machine mechanism push to tray follow packaging quantity (65pcs), output tray length increase
- ➔ For worker safety, extrusion on pusher will added cover.
- ➔ Follow up with other magnetize project with Nasheng after BB087 complete.
